

MedTrack QA Checklist

Project: MedTrack Healthcare Dashboard

Workbook: MedTrack_Dv.twbx

Module: Milestone 4 – Testing and Validation

Dashboard testing checklist

1. Hospital overview

Test item	Worksheet	Status
KPI cards displayed correctly	kpi card	Pass
Monthly admission trend visible	MAT	Pass
Occupancy monitoring chart displayed	OM	Pass
Gender distribution visualization displayed	GD	Pass
Hospital performance KPI section displayed	HP-KPI	Pass
Readmission monitoring visualization displayed	RM	Pass

2. Patient flow

Test item	Worksheet	Status
Patient flow KPI card displayed	KPI - C	Pass
Admission trend chart displayed	AT	Pass
Patient movement analysis displayed	PMA	Pass
Discharge trend chart displayed	DT	Pass
Average stay analysis displayed	ASA	Pass
Patient peak load monitoring displayed	PPLM	Pass

3. Department analytics

Test item	Worksheet	Status
Patient volume by department	Patient Vol by Depart.	Pass
Department performance analysis	Depart performance analysis	Pass
Department KPI cards	KPI cards	Pass
Treatment capacity analysis	Treatment capacity analysis	Pass
Readmission by department	Readmission by depart.	Pass
Department efficiency comparison	Depart efficiency comparison	Pass

4. Resource utilization

Test item	Worksheet	Status
Bed utilization analysis	Bed utilization analysis	Pass
Resource KPI section	KPI	Pass
Equipment utilization tracking	Equi utilization tracking	Pass
Resource availability analysis	Resource availability analysis	Pass
Staff monitoring	Staff monitoring	Pass
Capacity planning insights	Capacity planning insights	Pass

Calculated field validation

Calculated field	Validation
Department occupancy monitoring	Formula verified
Readmission by department	Formula verified
Age group classification	Formula verified
Patient peak load	Formula verified
Transfer rate	Formula verified

Calculated field	Validation
Discharge rate	Formula verified
Readmission	Formula verified
Capacity utilization	Formula verified
Selected Department parameter	Parameter linkage verified

Dashboard interaction testing

- Dashboard navigation across all four dashboards.
- Filter interaction through department parameter.
- KPI card visibility.
- Cross-dashboard consistency of department-based analytics.
- Resource utilization visual synchronization.

QA conclusion

All dashboards, worksheets, and calculated fields were successfully validated for structure, interaction, and calculation logic. No broken worksheet references were identified within the workbook structure.
