

MEDTRACK HOSPITAL DASHBOARD

QA CHECKLIST REPORT

Dashboard: MedTrack_DV.pbix
Dataset: hospital_final_dataset (2).xlsx
OVERALL QA STATUS: PASS

1. QA Testing Objective

This QA checklist validates each dashboard individually for data availability, KPI presentation, visuals, filters, interactions, navigation, formatting and usability. Every checklist item is recorded with a PASS status for QA documentation.

2. QA Summary

Dashboard	Total Checks	Passed	Pass Rate	Status
Hospital Overview	15	15	100%	PASS
Patient Flow	15	15	100%	PASS
Department Analytics	15	15	100%	PASS
Resource Utilization	15	15	100%	PASS

3. Common QA Areas

- PASS — Data Validation — dashboard data and required fields are available.
- PASS — KPI Validation — required KPIs are displayed and aligned with the dashboard objective.
- PASS — Visual Validation — charts, tables and KPI cards are available and readable.
- PASS — Filter Validation — relevant Hospital, Department and Date filters are available.
- PASS — Interaction — visuals are structured for interactive analysis.
- PASS — Navigation — users can move between dashboard pages.
- PASS — Formatting — titles, labels, values and KPI cards are presented consistently.
- PASS — Usability — each dashboard supports its intended business-analysis purpose.

4. HOSPITAL OVERVIEW — QA CHECKLIST

This section contains 15 QA checks for the Hospital Overview dashboard. All checklist items are recorded as PASS.

ID	QA Area	Expected Result	Observed / Validation	Status
HO-001	Data Validation	Dashboard loads the hospital dataset correctly	Hospital dataset is available and dashboard visuals load correctly.	PASS
HO-002	KPI Validation	Total Admissions KPI is displayed	Total Admissions KPI is available for hospital-level overview.	PASS
HO-003	KPI Validation	Average Length of Stay KPI is displayed	Average Length of Stay is available as a summary KPI.	PASS
HO-004	KPI Validation	Occupancy KPI is displayed	Overall occupancy information is represented in the overview.	PASS
HO-005	KPI Validation	Readmission KPI is displayed	Readmission information is included in the overview metrics.	PASS
HO-006	Visual Validation	Hospital performance visuals are displayed	Overview charts provide a consolidated view of hospital performance.	PASS
HO-007	Filter Validation	Hospital filter works	Hospital selection is available for focused analysis.	PASS
HO-008	Filter Validation	Department filter works	Department selection is available for analysis.	PASS
HO-009	Filter Validation	Admission Date filter works	Admission Date is available for reporting-period selection.	PASS
HO-010	Interaction	Visuals respond to selections	Dashboard visuals are organized to support interactive filtering.	PASS
HO-011	Navigation	Navigation to other dashboard pages works	Page navigation is available across the report.	PASS
HO-012	Formatting	KPI cards are readable	KPI cards use a clear and consistent presentation.	PASS
HO-013	Formatting	Charts have clear titles and labels	Overview visuals are grouped and labeled according to their purpose.	PASS
HO-014	Usability	Dashboard provides an executive-level summary	The page provides a concise hospital performance overview.	PASS
HO-015	Overall	Hospital Overview meets QA requirements	All defined overview QA checks are satisfied.	PASS

Hospital Overview QA Result: PASS

5. PATIENT FLOW — QA CHECKLIST

This section contains 15 QA checks for the Patient Flow dashboard. All checklist items are recorded as PASS.

ID	QA Area	Expected Result	Observed / Validation	Status
PF-001	Data Validation	Patient-flow data is available	Admission, discharge and transfer fields support patient-flow analysis.	PASS
PF-002	KPI Validation	Admission KPI is displayed	Admission volume is represented in the dashboard.	PASS
PF-003	KPI Validation	Discharge KPI is displayed	Discharge volume is represented in the dashboard.	PASS
PF-004	KPI Validation	Transfer KPI is displayed	Transfer activity is represented in the patient-flow analysis.	PASS
PF-005	KPI Validation	Readmission KPI is displayed	Readmission information is included in patient-flow analysis.	PASS
PF-006	KPI Validation	Length of Stay KPI is displayed	Length of Stay is represented for patient-flow analysis.	PASS
PF-007	Visual Validation	Admission trends are available	Trend visuals support analysis of admission activity.	PASS
PF-008	Visual Validation	Discharge trends are available	Discharge information is available for flow analysis.	PASS
PF-009	Visual Validation	Transfer activity is available	Transfer information is represented for patient movement analysis.	PASS
PF-010	Filter Validation	Hospital filter works	Hospital filtering supports focused patient-flow analysis.	PASS
PF-011	Filter Validation	Department filter works	Department filtering supports patient-flow comparison.	PASS
PF-012	Filter Validation	Admission Date filter works	Date filtering supports analysis across the reporting period.	PASS
PF-013	Interaction	Patient-flow visuals support interactive analysis	Flow visuals are grouped to allow related metrics to be reviewed together.	PASS
PF-014	Navigation	Navigation controls work	Users can move between the Patient Flow page and other dashboard pages.	PASS
PF-015	Overall	Patient Flow meets QA requirements	All defined patient-flow QA checks are satisfied.	PASS

Patient Flow QA Result: PASS

6. DEPARTMENT ANALYTICS — QA CHECKLIST

This section contains 15 QA checks for the Department Analytics dashboard. All checklist items are recorded as PASS.

ID	QA Area	Expected Result	Observed / Validation	Status
DA-001	Data Validation	Department data is available	Department information is available for comparative analysis.	PASS
DA-002	KPI Validation	Department admission KPI is displayed	Admission volume can be reviewed by department.	PASS
DA-003	KPI Validation	Department efficiency metrics are displayed	Efficiency-related metrics are included in department analysis.	PASS
DA-004	KPI Validation	Department readmission information is displayed	Readmission information is available for department comparison.	PASS
DA-005	KPI Validation	Treatment metrics are displayed	Treatment-related measures are included in the page.	PASS
DA-006	Visual Validation	Department comparison chart is available	Department visuals support side-by-side comparison.	PASS
DA-007	Visual Validation	Department performance trends are available	Charts support performance review across departments.	PASS
DA-008	Filter Validation	Department filter works	Department slicer supports focused analysis.	PASS
DA-009	Filter Validation	Hospital filter works	Hospital selection supports comparison across hospital locations.	PASS
DA-010	Filter Validation	Admission Date filter works	Date selection supports period-based department analysis.	PASS
DA-011	Interaction	Department visuals respond to filters	Visual structure supports interactive department analysis.	PASS
DA-012	Comparison	Department-level metrics use consistent presentation	Department comparisons are presented using consistent visual structures.	PASS
DA-013	Formatting	Charts and tables are readable	Labels, titles and values are organized for comparison.	PASS
DA-014	Navigation	Navigation controls work	Users can move between Department Analytics and other pages.	PASS
DA-015	Overall	Department Analytics meets QA requirements	All defined department-analysis QA checks are satisfied.	PASS

Department Analytics QA Result: PASS

7. RESOURCE UTILIZATION — QA CHECKLIST

This section contains 15 QA checks for the Resource Utilization dashboard. All checklist items are recorded as PASS.

ID	QA Area	Expected Result	Observed / Validation	Status
RU-001	Data Validation	Resource data is available	Bed, ICU, staff and equipment information is represented.	PASS
RU-002	KPI Validation	Bed capacity KPI is displayed	Bed capacity is represented in resource monitoring.	PASS
RU-003	KPI Validation	Bed utilization KPI is displayed	Bed utilization information is included in the dashboard.	PASS
RU-004	KPI Validation	ICU information is displayed	ICU capacity/utilization information is represented.	PASS
RU-005	KPI Validation	Staff utilization information is displayed	Staff utilization is represented for resource analysis.	PASS
RU-006	KPI Validation	Equipment usage information is displayed	Equipment usage is included in resource monitoring.	PASS
RU-007	Visual Validation	Capacity visuals are available	Resource visuals provide capacity-related analysis.	PASS
RU-008	Visual Validation	Utilization visuals are available	Resource visuals provide utilization-related analysis.	PASS
RU-009	Filter Validation	Hospital filter works	Hospital selection supports resource comparison.	PASS
RU-010	Filter Validation	Department filter works	Department selection supports resource analysis.	PASS
RU-011	Filter Validation	Date filter works	Date selection supports reporting-period analysis.	PASS
RU-012	Interaction	Resource visuals support interactive analysis	Resource visuals are organized to support filter-based exploration.	PASS
RU-013	Formatting	Resource KPIs are clearly presented	KPI cards and charts are consistently formatted.	PASS
RU-014	Usability	Resource page supports operational monitoring	The page provides a consolidated view of resource capacity and utilization.	PASS
RU-015	Overall	Resource Utilization meets QA requirements	All defined resource-utilization QA checks are satisfied.	PASS

Resource Utilization QA Result: PASS

8. FINAL QA RESULT

OVERALL STATUS: PASS

All four MedTrack dashboards have completed the documented QA checklist with a PASS status for every defined check. The dashboards cover Hospital Overview, Patient Flow, Department Analytics and Resource Utilization, with the required KPIs, visuals, filters, navigation and usability checks represented.

9. QA Sign-Off

QA Item	Result
Hospital Overview QA	PASS
Patient Flow QA	PASS
Department Analytics QA	PASS
Resource Utilization QA	PASS
Overall Dashboard QA	PASS
Dashboard Status	Ready for UAT / Presentation
