

MedTrack QA Checklist

Project: MedTrack Healthcare Dashboard

File: MedTrack_Dv.pbix

Module: Milestone 4 – Testing & Validation

KPI Accuracy: > 95% Satisfied

Target Criteria: No Major Dashboard Issues

QA Status: PASSED

1. DASHBOARD TESTING CHECKLIST

1.1 Hospital Overview

TEST ITEM	VISUAL COMPONENT	VALIDATION TARGET & DESCRIPTION	STATUS
KPI cards displayed correctly	KPI Card	Admissions, ALOS, Bed Occupancy %, Avg Billing Amount, Equipment	PASS
Monthly admission trend visible	Admissions Overview	Daily cycle line curve across full monthly range	PASS
Occupancy monitoring chart displayed	Occupancy Monitoring	Gauge indicator showing percentage bed occupancy	PASS
Readmission monitoring visualization displayed	Readmission Analysis	Donut chart tracking readmission yes/no distribution	PASS
Hospital performance KPI section displayed	Hospital Performance KPIs	Horizontal bar chart tracking admissions by facility	PASS
Monthly operational trends displayed	Monthly Operational Trends	Area chart tracking monthly billing amount scale	PASS

1.2 Patient Flow

TEST ITEM	VISUAL COMPONENT	VALIDATION TARGET & DESCRIPTION	STATUS
Patient flow KPI card displayed	KPI - C	Total Admissions, Total Discharges, Transfers, Readmission Rate %, ALOS	PASS
Admission trend chart displayed	Admission Trends	Monthly admissions timeline curve	PASS
Discharge tracking chart displayed	Discharge Tracking	Monthly discharge volume breakdown bars	PASS
Patient movement analysis displayed	Patient Movement Analysis	Waterfall chart tracking department transfers	PASS
Average stay analysis displayed	Average Stay Analysis	Department distribution across length of stay	PASS
Patient peak load monitoring displayed	Peak Patient Load Monitoring	Stacked area load tracking across admission types	PASS

1.3 Department Analytics

TEST ITEM	VISUAL COMPONENT	VALIDATION TARGET & DESCRIPTION	STATUS
Department KPI cards displayed	KPI Cards	Total Depts, ALOS, Readmission Rate %, Bed Occupancy %, Total Transfers	PASS
Treatment capacity analysis displayed	Treatment Capacity Analysis	Bed capacity distribution across specialties	PASS
Readmission by department displayed	Readmission by Department	Stacked bar tracking readmission rates per department	PASS
Department efficiency comparison displayed	Department Efficiency Comparison	Gauge indicator displaying department efficiency level	PASS
	Patient Volume by Department		PASS

TEST ITEM	VISUAL COMPONENT	VALIDATION TARGET & DESCRIPTION	STATUS
Patient volume by department displayed		Stacked bar tracking Beds Available vs. Beds Occupied	
Department performance analysis displayed	Department Performance Analysis.	Average length of stay comparison across departments	PASS

1.4 Resource Utilization

TEST ITEM	VISUAL COMPONENT	VALIDATION TARGET & DESCRIPTION	STATUS
Resource KPI section displayed	KPI	Beds Available, Bed Occupancy %, ICU Beds, Staff Util %, Equipment In Use	PASS
Bed utilization analysis displayed	Bed Utilization Analysis	Occupancy variance curve across departments	PASS
Staff monitoring displayed	Staff Allocation Monitoring	Horizontal bar chart tracking staff allocation across departments	PASS
Equipment utilization tracking displayed	Equipment Utilization Tracking	Donut chart tracking In Use, Available, and Under Maintenance	PASS
Capacity planning insights displayed	Capacity Planning Insights	Area chart monitoring departmental bed capacity limits	PASS
Resource availability analysis displayed	Resource Availability Analysis	Column chart tracking ICU resource allocations per department	PASS

2. CALCULATED FIELD & DAX MEASURE VALIDATION

CALCULATED FIELD / DAX MEASURE	VALIDATION TYPE	VALIDATION
Department occupancy monitoring	Aggregation & Percentage Verification	Verified
Readmission by department	Conditional Logic & Specialty Split	Verified
Patient peak load	Admission Type Breakdown & Aggregation	Verified
Transfer rate	Movement Tracking & Ratio Verification	Verified
Discharge rate	Discharge Tracking & Census Ratio	Verified
Readmission rate	Patient Identifier & Recurrence Logic	Verified
Capacity utilization	Resource Utilization Logic	Verified
Selected Department parameter	Cross-Report Slicer Interaction	Linkage verified

3. DASHBOARD INTERACTION & PATIENT FLOW TESTING

- Seamless tab transitions across Hospital Overview, Patient Flow, Department Analytics, and Resource Utilization with zero broken visual references.
- Dynamic synchronization across Department, Hospital Name, City, Admission Type, and Month slicers.
- Waterfall movement analysis, monthly discharge trends, and emergency/elective peak load distributions align with overall census logic.
- Multi-axis charts, gauges, and donut splits maintain rendering stability during multi-slicer filtering.

QA CONCLUSION & SIGN-OFF

All report pages, visual components, navigation pathways, and DAX calculated measures were successfully validated for structural integrity, user interaction, and calculation accuracy (KPI accuracy > 95% satisfied). No major dashboard issues or broken visual references were identified.
