MedTrack Healthcare Dashboard

Hospital Overview Dashboard — Description

📋 PURPOSE

Provides an executive-level overview of hospital operations, enabling administrators to monitor key performance indicators, track admission trends, and assess overall hospital efficiency in real time.

📊 KEY PERFORMANCE INDICATORS (KPIs)

- Total Admissions — Total number of patients admitted (10,000)
- Avg. Length of Stay — Average days per patient stay (20.4 Days)
- Readmission Rate — % of patients readmitted within 30 days (49.87%)
- Bed Occupancy Rate — % of beds currently in use (36.76%)
- Staff Utilization Rate — % of staff actively engaged (57.92%)
- Department Efficiency Score — Composite efficiency metric (65.99)

📈 CHARTS & VISUALIZATIONS

- Monthly Admission Trend — Line chart showing admission volume over time to identify seasonal patterns
- Admissions by Department — Horizontal bar chart comparing patient load across departments
- Gender Distribution — Donut chart displaying male vs. female patient breakdown
- Hospital Type Distribution — Donut chart segmenting admissions by hospital category

🔍 FILTERS

• Hospital Name | Hospital Type | Department | Admission Date | Gender

⚡ INTERACTIVE ACTIONS

- Cross Filtering — Selecting one visual filters all related visuals
- Highlight — Emphasizes selected data across charts
- Navigation — Links to Patient Flow, Department Analytics & Resource pages
- Drill Through — Click KPI cards to explore detailed sub-reports

Patient Flow Dashboard – Description

01

Purpose: Monitor patient movement from admission to discharge, tracking trends in admissions, discharges, and transfers across departments.

02

Filters: Admission Date Range, Department Selector, Transfer Status, Admission Type (Emergency / Elective / Referral).

03

Charts: Admissions by Month (Line), Discharges by Month (Bar), Transfer Analysis (Funnel), Readmission Trend (Area), Avg LOS by Department (Bar), Admission Type Distribution (Donut).

04

Actions: Cross-Filter by chart selection, Highlight patient segments, Navigate to Department Analytics, Drill Through to patient-level detail.

Department Analytics Dashboard — Description

PURPOSE

Compare departmental performance and operational efficiency across all hospital units.

CHARTS & VISUALIZATIONS

-  Department Admissions — Bar chart comparing total admissions per department
-  Department Efficiency Score — KPI cards with score per unit
-  Average LOS by Department — Horizontal bar chart
-  Readmission Rate by Department — Column chart with benchmarks
-  Diagnosis Distribution — Treemap of top diagnoses per dept
-  Staff Count by Department — Stacked bar chart

FILTERS

• Department • Diagnosis • Admission Date

DEPARTMENT COMPARISONS

 Admissions

Ranks departments by total patient admissions to identify high-demand units requiring resource scaling.

 Average Length of Stay (LOS)

Compares mean LOS across departments to highlight inefficiencies and discharge bottlenecks.

 Readmission Rate

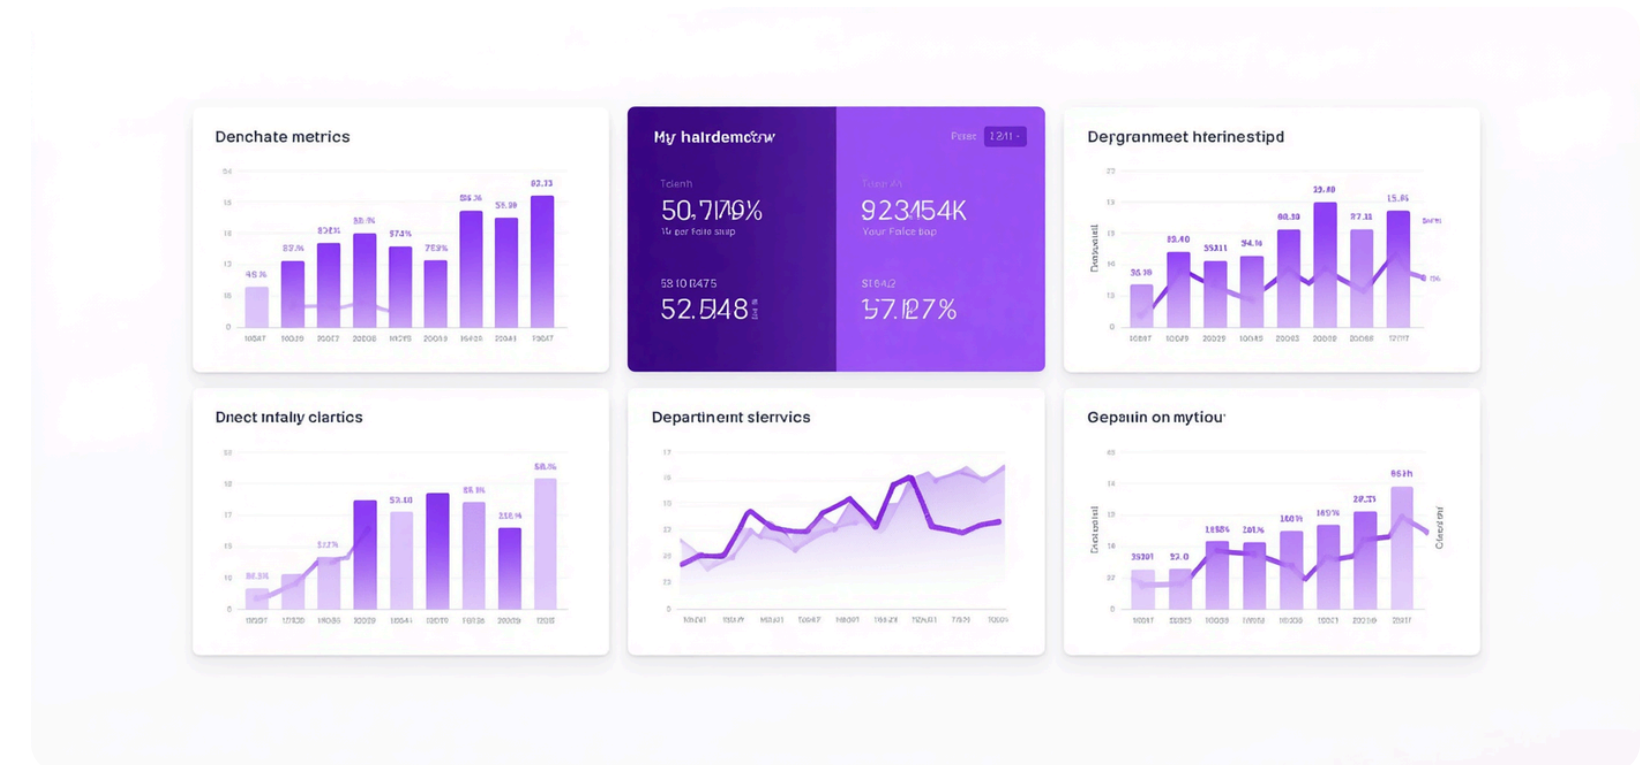

Monitors 30-day readmission rates per department to flag quality-of-care concerns.

 Efficiency Score

Aggregated performance metric combining LOS, readmission, and occupancy per department.

ACTIONS

- ◆ Filter — Slice data by dept, diagnosis & date
- ◆ Highlight — Cross-highlight related visuals
- ◆ Navigation — Switch between dashboard pages

Resource Utilization Dashboard – Description

Purpose

Monitor hospital resources and optimize operational efficiency across beds, staff, and equipment.

Charts & Visualizations

Bed Occupancy Rate | Staff Utilization Rate | Equipment Utilization | Equipment Status | ICU Utilization | Beds Available vs Occupied
