

MedTrack

Hospital Operations & Patient Analytics Dashboard

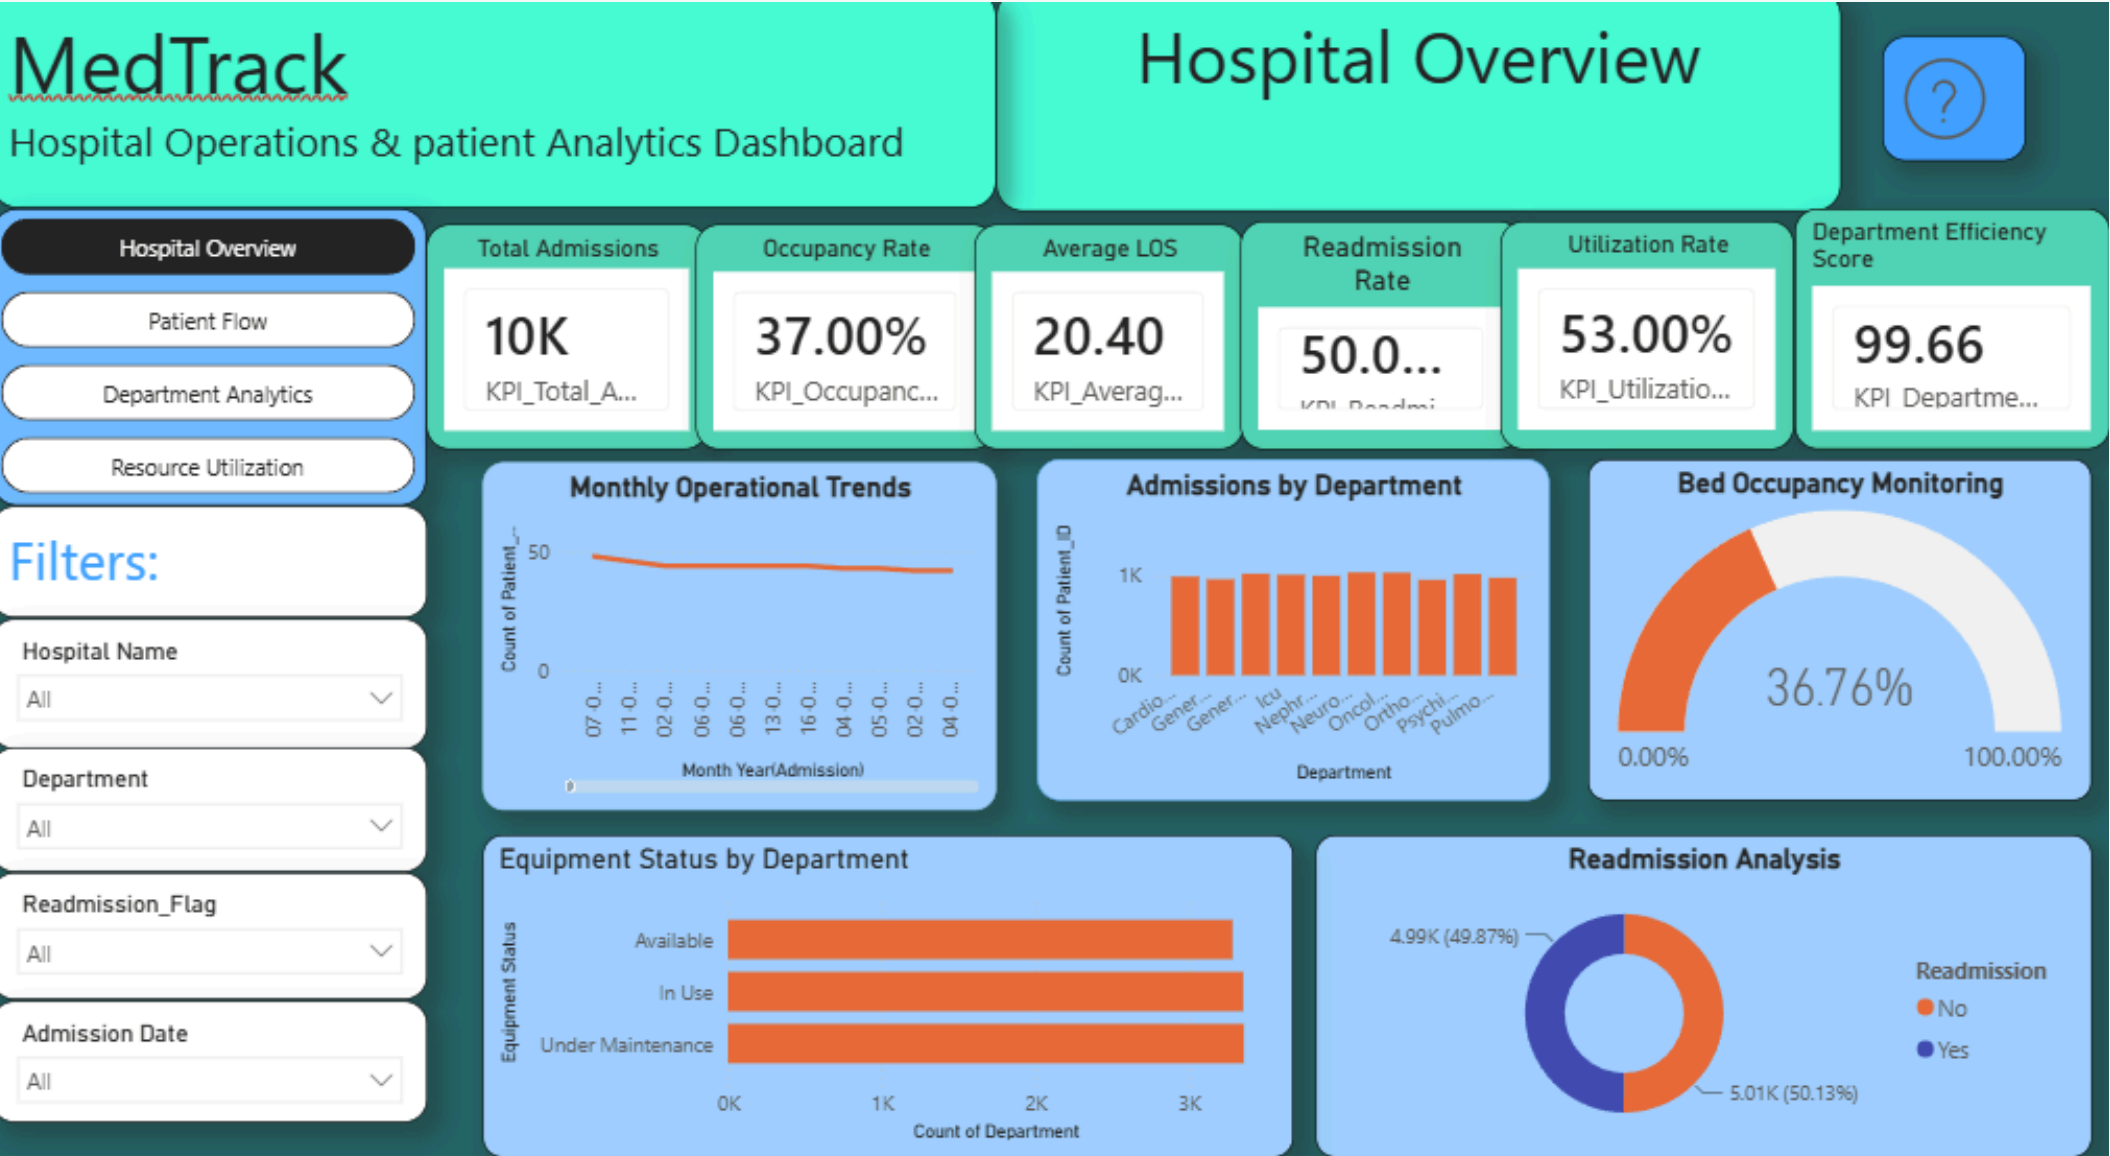

Comprehensive insights into hospital performance, patient flow, departments, and resource utilization

Hospital Overview

Dashboard flow · KPIs & visualization reference

FILTERS Hospital Name ▾ Department ▾ Admission Date ▾

01 Monthly trends

02 Admissions

03 Bed occupancy

04 Equipment

05 Readmission

Hospital Overview visualization guide

A concise reading guide for the dashboard’s core views.

01 **KPI cards**

A rapid snapshot of hospital-wide performance, averages, and occupancy.

02 **Monthly operational trends**

Tracks activity patterns and operational change over time.

03 **Admissions by department**

Reveals the busiest departments and shifts in demand.

04 **Bed occupancy gauge**

Shows current capacity pressure at a glance.

05 **Equipment status by department**

Compares availability and active use across teams.

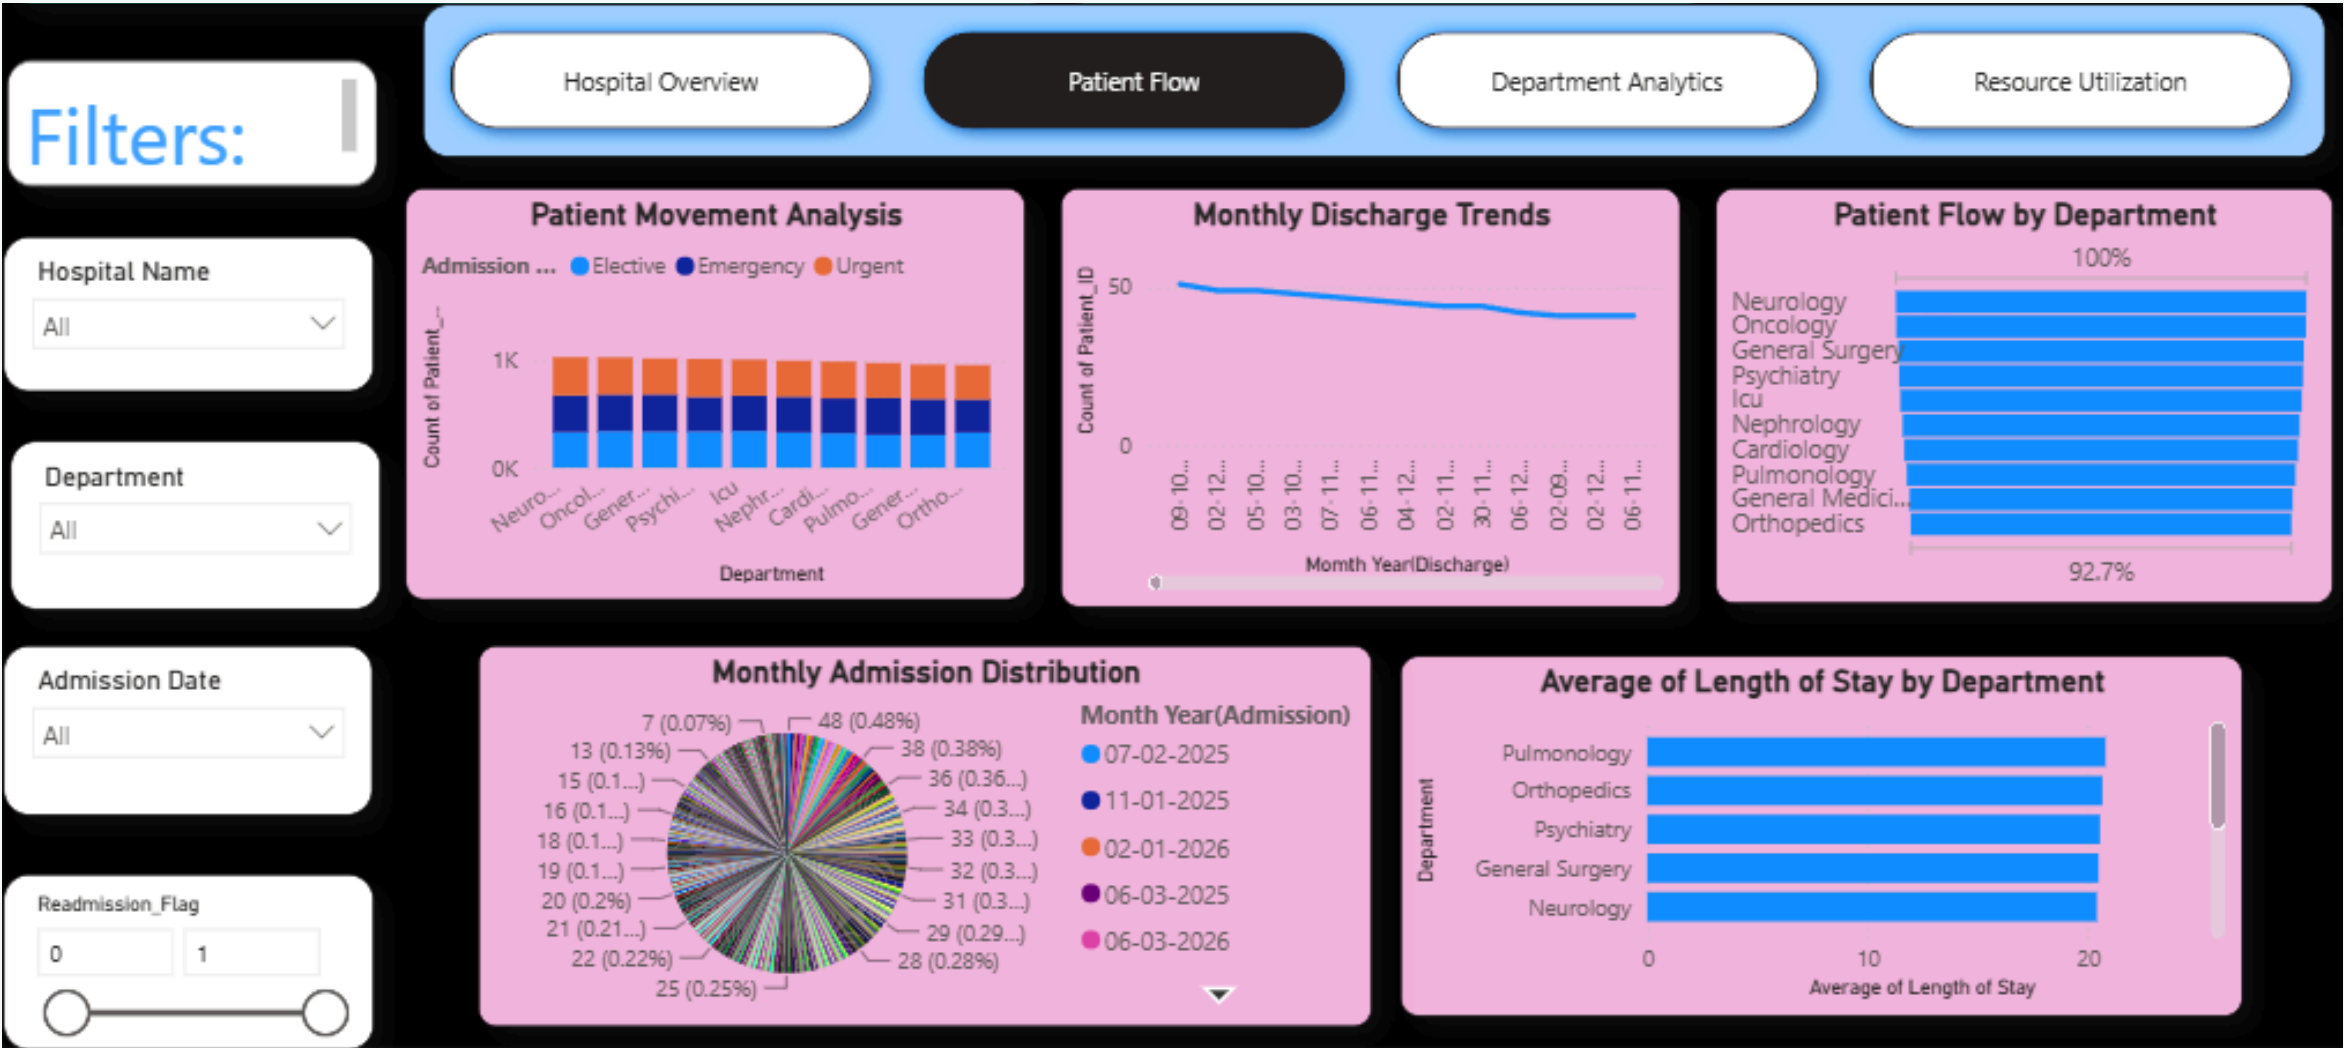

06 **Readmission analysis**

Highlights the share of patients returning after discharge.

Patient Flow

Dashboard flow · KPIs & visualization reference

FILTERS Date range ▾ Department ▾ Status ▾

Patient Flow visualization guide

A concise reading guide for the dashboard’s core views.

01 **Patient movement analysis**

Maps patient transitions across hospital areas.

02 **Monthly discharge trends**

Shows discharge volume and changes over time.

03 **Patient flow by department**

Compares patient traffic across departments.

04 **Monthly admission distribution**

Displays how admissions vary by month or date.

05 **Average length of stay**

Identifies departments where patients remain longer.

Department Analytics

Dashboard flow · KPIs & visualization reference

FILTERS Date range ▾ Department ▾ Status ▾

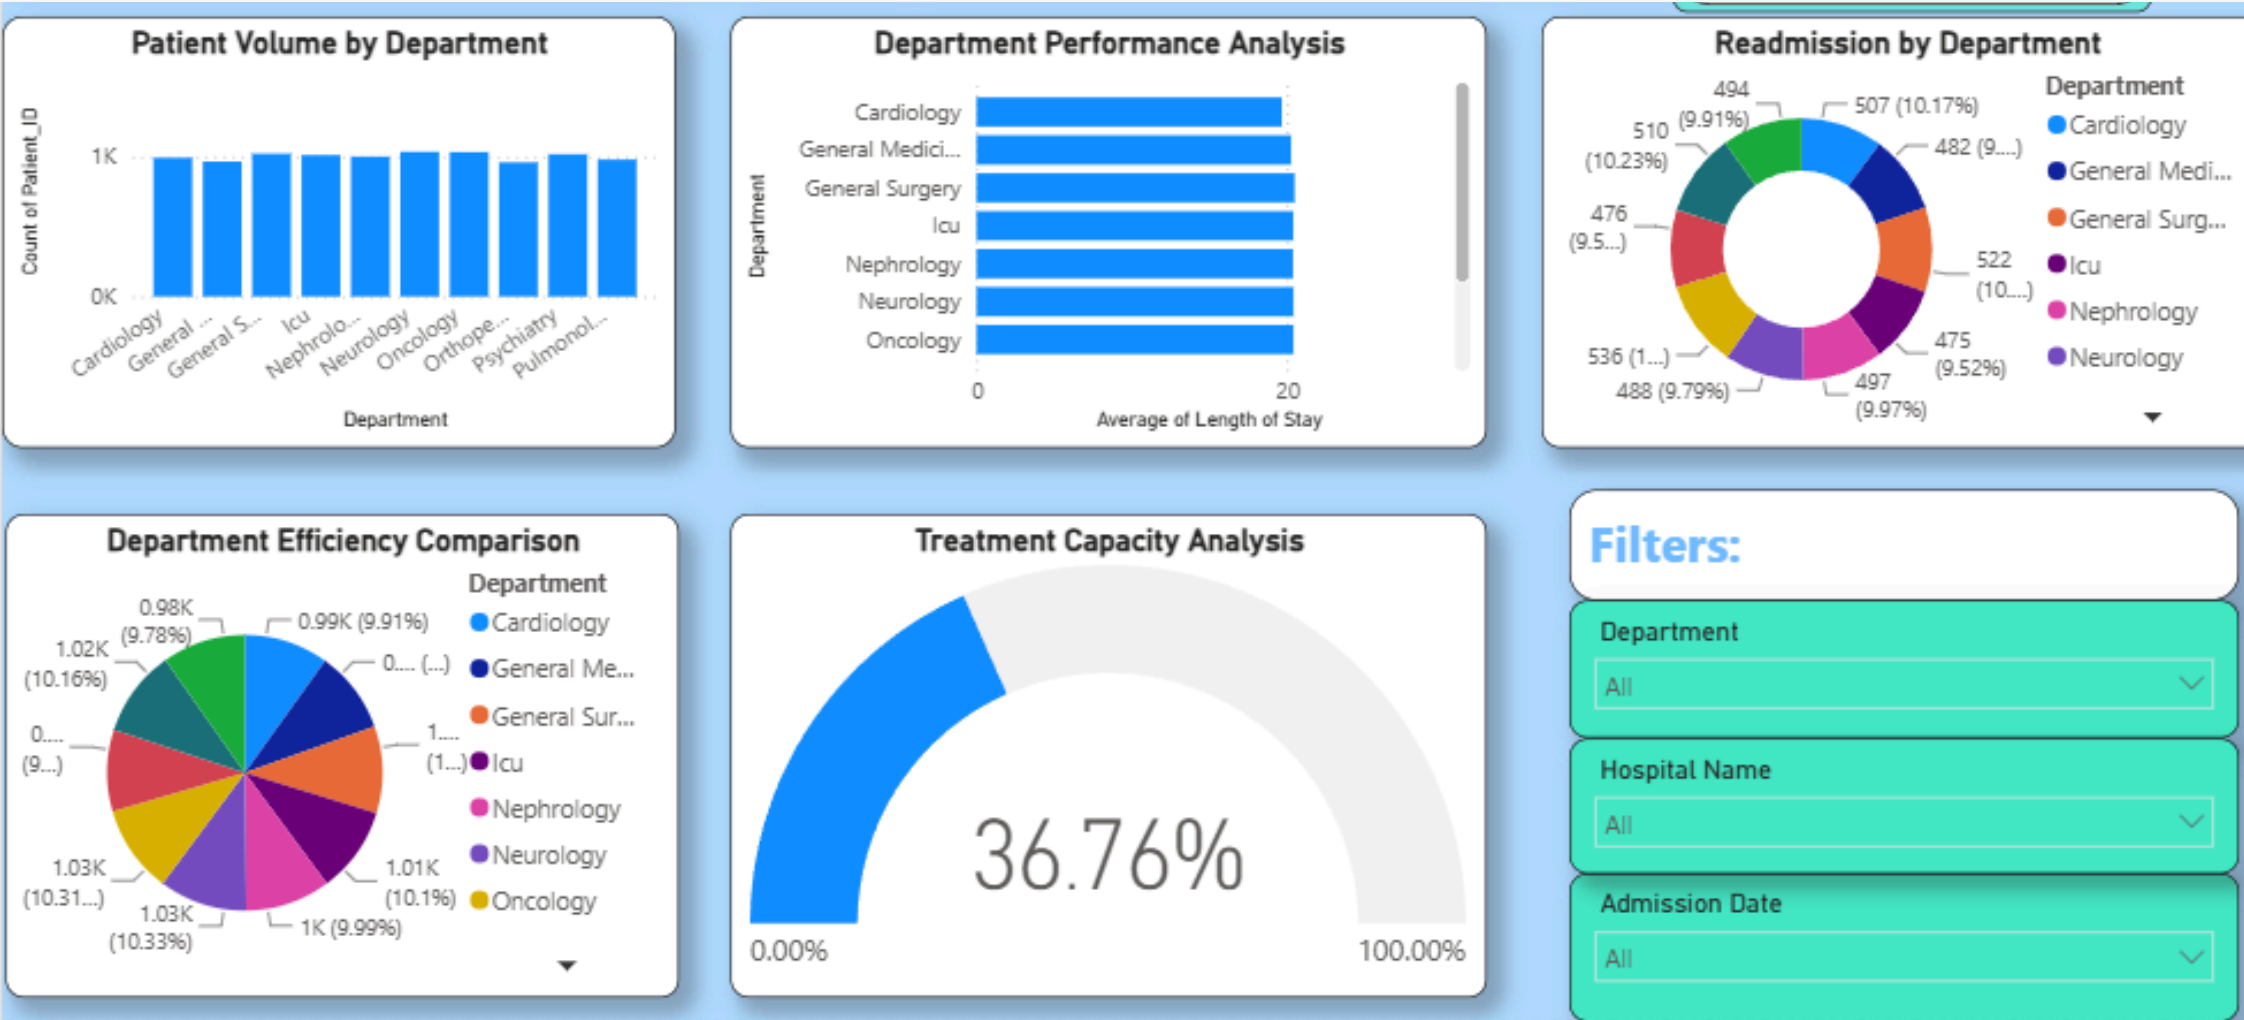

01 Patient volume

02 Performance

03 Readmission

04 Efficiency

05 Capacity

Department Analytics visualization guide

A concise reading guide for the dashboard’s core views.

01 Patient volume by department
Compares patient load between clinical teams.

02 Department performance analysis
Benchmarks operational efficiency across departments.

03 Readmission by department
Surfaces departments with higher return rates.

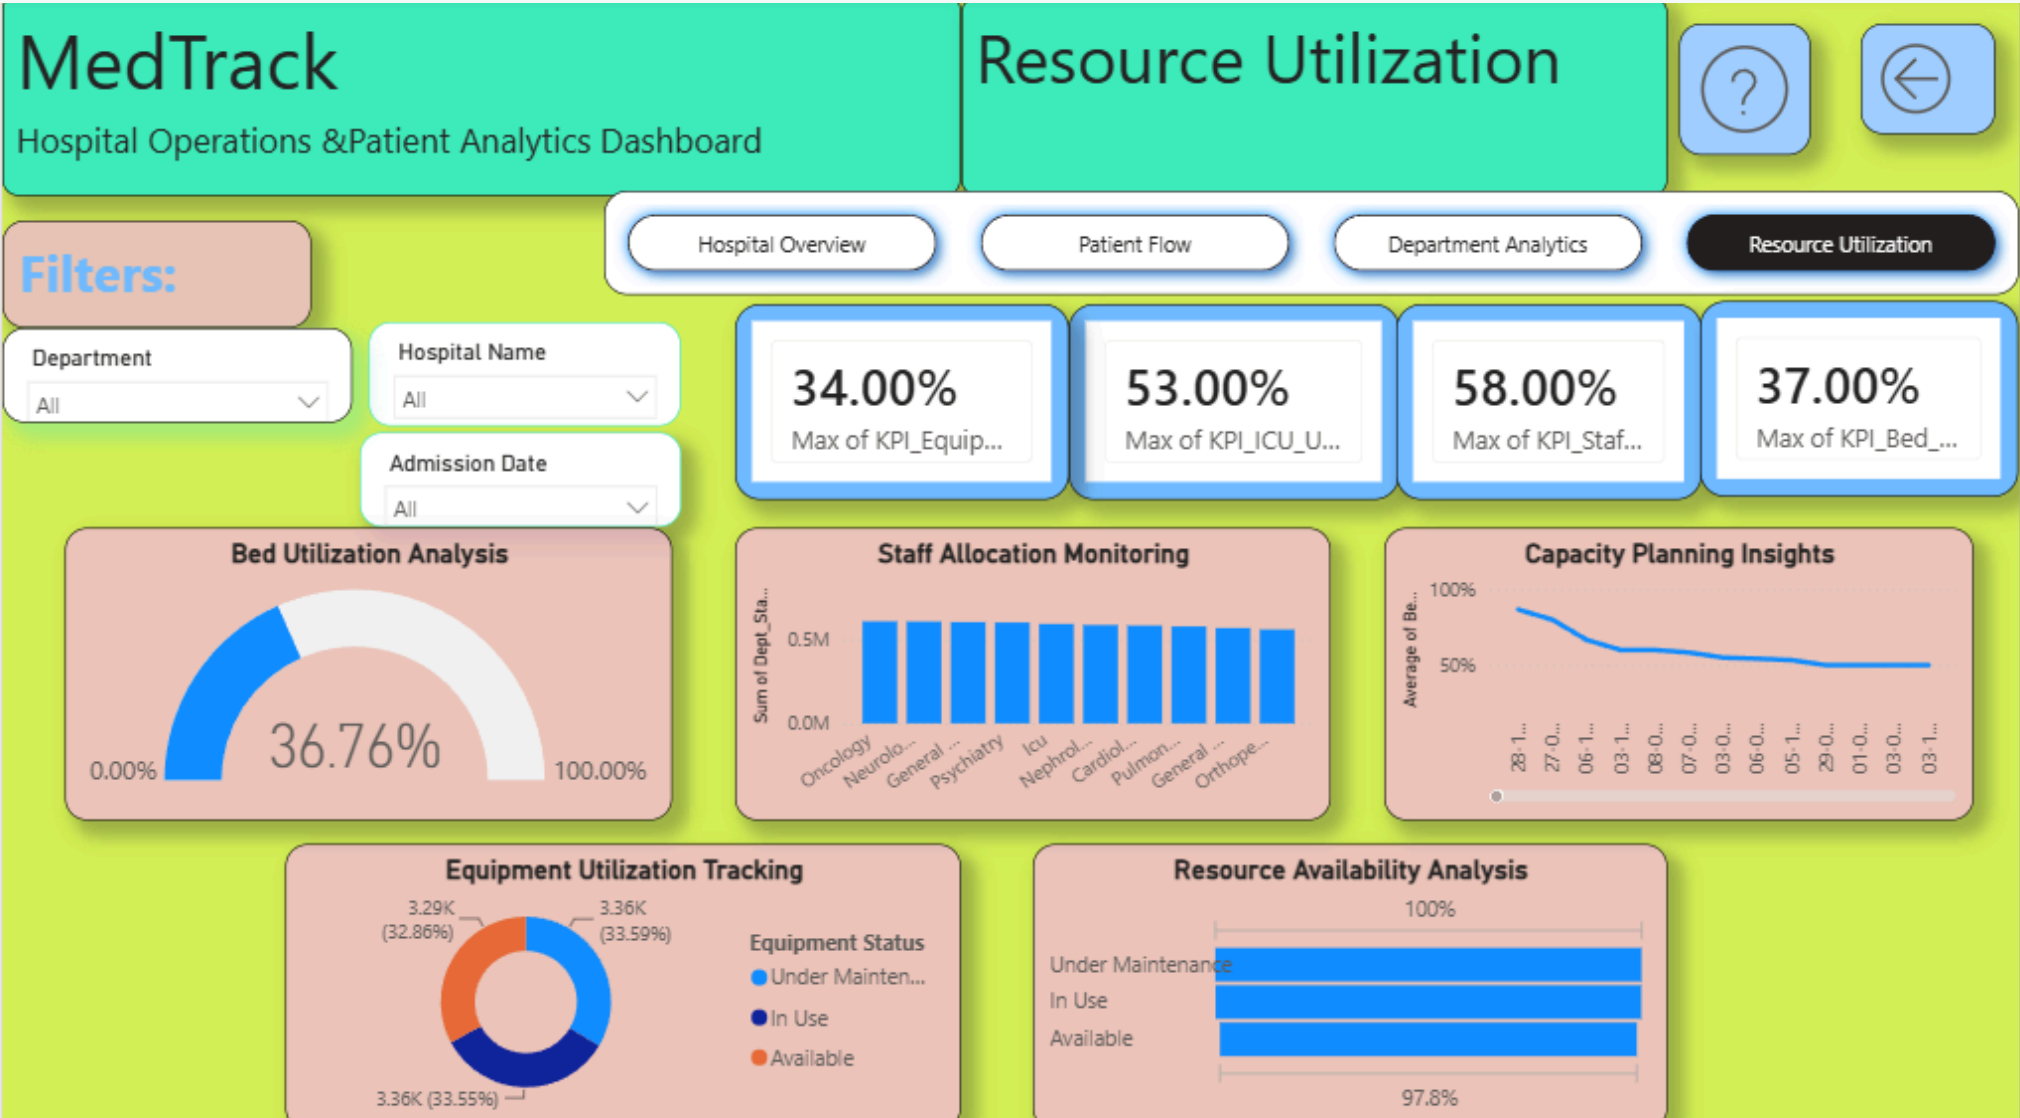

04 Department efficiency comparison
Shows relative operational efficiency.

05 Treatment capacity gauge
Indicates current capacity usage and headroom.

Resource Utilization

Dashboard flow · KPIs & visualization reference

FILTERS Date range ▾ Department ▾ Status ▾

01 KPI cards

02 Staff allocation

03 Capacity planning

04 Equipment

05 Availability

Resource Utilization visualization guide

A concise reading guide for the dashboard’s core views.

01

Utilization KPI cards

Summarize resource performance and capacity signals.

02

Staff allocation monitoring

Shows how staff are distributed across departments.

03

Capacity planning

Supports forecasting with resource trend patterns.

04

Equipment utilization tracking

Measures equipment usage frequency.

05

Resource availability analysis

Reveals resource sufficiency or shortage.
