# Dashboard Definitions

Filters, navigation, actions and department-comparison logic for each of the 4 dashboards.

## 1 · Hospital Overview

### FILTERS

- Date Range
- State
- Hospital Type
- Hospital Name
- Admission Type
- Insurance Provider

### DASHBOARD ACTIONS

Click a state bar to cross-filter every chart on the page to that state. Hover any KPI card for a definition tooltip. Click a donut segment to isolate one admission type.

### NAVIGATION

Top tab bar switches between the 4 dashboards; state persists across tabs.

### DEPARTMENT COMPARISONS

Admissions, Avg LOS and Readmission Rate are shown side-by-side per department to spot outliers at a glance.

## 2 · Patient Flow

### FILTERS

- Date Range
- Department
- Gender
- Admission Type
- Age Group

### DASHBOARD ACTIONS

Click a funnel stage to drill into the underlying patient list. Toggle Admissions/Discharges series on the trend chart via the legend checkboxes.

### NAVIGATION

Reached via the 'Patient Flow' tab; inherits any active filters from Overview.

### DEPARTMENT COMPARISONS

Department bars in the funnel view rank departments by patient volume so flow bottlenecks are visible immediately.

## 3 · Department Analytics

### FILTERS

- Date Range
- Department
- Doctor
- Hospital Type

### DASHBOARD ACTIONS

Click a table column header to sort all departments by that KPI. Click a department row to highlight its bars across all three charts below.

### NAVIGATION

Reached via the 'Department Analytics' tab; the comparison table is the anchor for this page.

### DEPARTMENT COMPARISONS

The 7-column matrix is the primary comparison tool: Admissions, Occupancy, LOS, Readmission, Staff Utilization and Efficiency Score are all normalized to the same department order.

## 4 · Resource Utilization

### FILTERS

- Date Range
- Department
- Equipment
- Equipment Status

### DASHBOARD ACTIONS

Click an Equipment Status donut segment to filter the inventory and usage-hours charts to that status. Hover a bar for the exact department value.

### NAVIGATION

Reached via the 'Resource Utilization' tab; equipment filter chips only appear on this page.

### DEPARTMENT COMPARISONS

Equipment inventory and staff utilization are charted per department in parallel so capacity gaps line up visually.
