Hospital Type

All

Hospital Operations and Patient Analytics

Total admissions

10,000

Occupancy Rate

36.76%

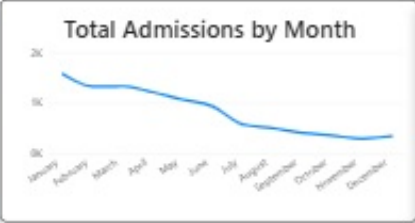

Avg Length of stay

78.78

Readmission Rate

50%

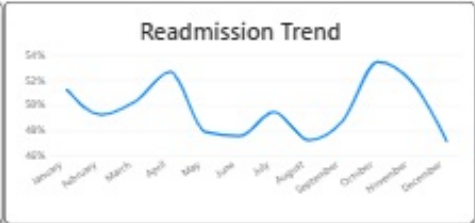

Total Admissions by Month

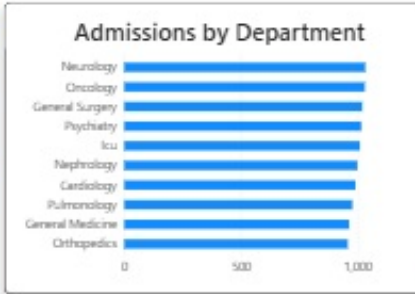

Occupancy Rate by Month

Readmission Trend

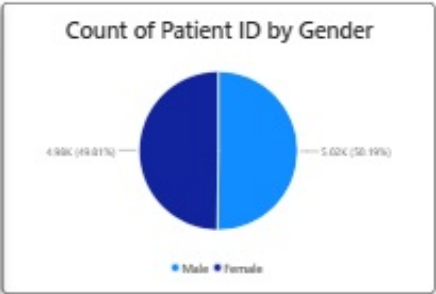

Admissions by Department

Admissions vs Discharges

Count of Patient ID by Gender

P PURPOSE

Landing dashboard giving hospital leadership a real-time view of enterprise-level KPIs, monthly trends, and department/gender breakdowns across all 20 hospitals.

C CHARTS

- Total Admissions by Month (Line)
- Occupancy Rate by Month (Line)
- Readmission Trend (Line)
- Admissions by Department (Bar, ranked)
- Admissions vs. Discharges (Clustered Column)
- Count of Patient ID by Gender (Pie)

F FILTERS

- Admission Date (range slider)
- Hospital Name
- Department Name
- Hospital Type

N NAVIGATION

Sidebar tabs (Overview, Patient Flow, Department Analytics, Resource Utilization) built as page-navigation buttons.

MED TRACK

Overview

Patient Flow

Department Analytics

Resource Utilization

ADMISSION DATE

01-01-2025 - 06-11-2026

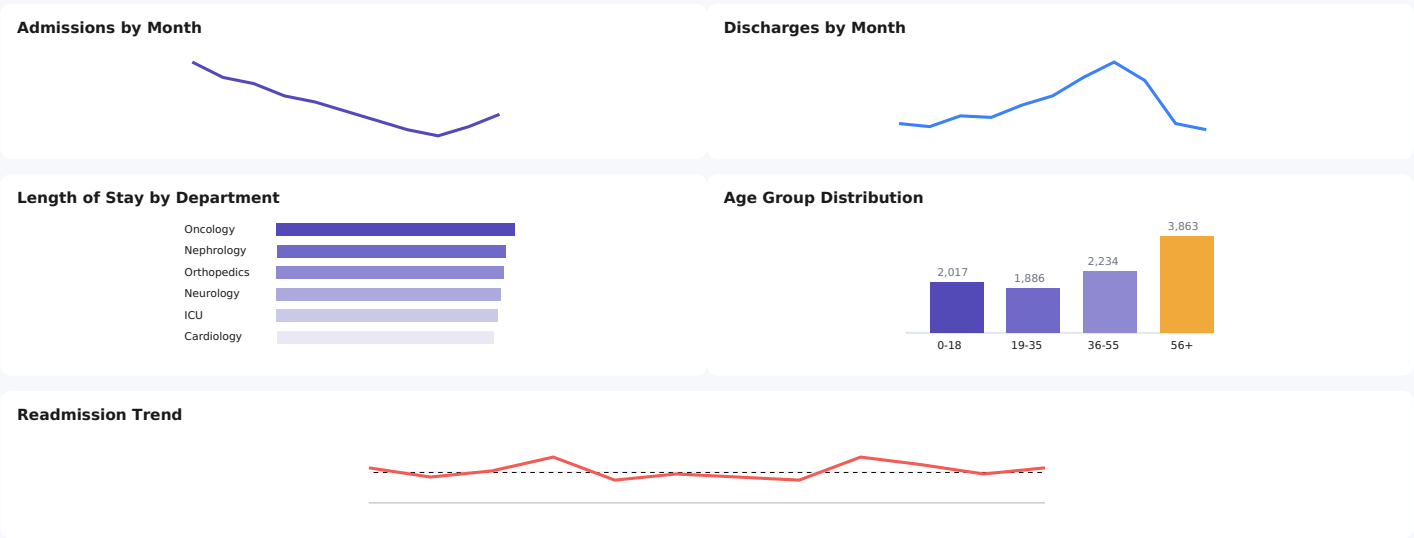

DEPARTMENT NAME

All

HOSPITAL TYPE

All

Patient Flow

P PURPOSE

Monitor patient movement from admission to discharge, and how stay length and readmissions vary by age and department.

C CHARTS

- Admissions by Month (Line)
- Discharges by Month (Line)
- Length of Stay by Department (Bar)
- Age Group Distribution (Bar)
- Readmission Trend (Line)

F FILTERS

- Admission Date
- Department Name
- Age Group (new calc)

B BUILD NOTE

Age Group needs a calculated column:
IF(Age<=18,"0-18",IF(Age<=35,"19-35",IF(Age<=55,"36-55","56+")))

Build target — charts and layout to build in Power BI, matching Screen 1's styling

Department Analytics

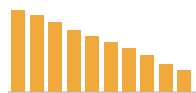

Department Admissions

Doctor Count

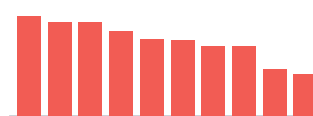

Efficiency Score

Average LOS by Department

Readmission by Department

Build target — charts and layout to build in Power BI, matching Screen 1's styling

P PURPOSE

Compare departmental performance, workload, and efficiency across all 10 departments.

C CHARTS

- Department Admissions (Bar)
- Doctor Count (Bar)
- Department Efficiency Score (Bar, ranked)
- Average LOS by Department (Bar)
- Readmission by Department (Bar)

F FILTERS

- Department Name
- Doctor

B BUILD NOTE

Efficiency Score measure:

$$(AVG(Staff_Utilization_Calc)*0.5) + ((100 - AVG(Readmission_Flag)*100)*0.5)$$

Staff Count by Dept

--	--	--	--	--	--	--	--	--	--	--

ICU Beds by Hospital

Fortis Hospital	
Cure Well Hospital	
Aster Hospital	
Deepak Hospital	
A A Hospital	

Beds Available vs Occupied

--	--	--	--	--	--	--

Build target — charts and layout to build in Power BI, matching Screen 1's styling

P PURPOSE

Monitor hospital resources — beds, staff, and equipment — to plan capacity.

C CHARTS

- Bed Utilization by Department (Bar)
- Equipment Status (Bar, 3 states)
- Staff Count by Department (Bar)
- ICU Beds by Hospital (Bar, top hospitals)
- Beds Available vs. Occupied by Dept (Clustered Column)

F FILTERS

- Hospital Name
- Equipment Status

B BUILD NOTE

"Beds Occupied" needs a calculated column since Bed Occupied is Yes/No text:
IF(Bed Occupied="Yes",1,0)
